/100 (D)

CRITICAL 0 | HIGH 9 | MEDIUM 1278 | LOW 298

1577 findings across 6 categories | AI: LLMProvider.GROQ/llama-3.3-70b-versatile

RISK DASHBOARD

IMMEDIATE ACTIONS REQUIRED

1. Address BLK-1012: Docker Container Running as Root
2. Address BLK-1013: Docker Container Running as Root
3. Address BLK-247: Missing Error Handling on External Calls

TOP PRIORITY FINDINGS

HIGH	Missing Error Handling on External Calls
HIGH	Missing Error Handling on External Calls
HIGH	Missing Input Validation at System Boundary
HIGH	Operations Without Audit Logging
HIGH	Silent Exception Swallowing

COMPLIANCE POSTURE

SOC2 — 2/5 controls passing (2 failing)

REMEDIATION ROADMAP

URGENT — Days 1-14

10 hours estimated effort

Score: 40 -> 42 (+2 points)

5 tasks

SHORT-TERM — Days 15-45

24 hours estimated effort

Score: 42 -> 42 (+0 points)

12 tasks

MEDIUM-TERM — Days 46-90

3110 hours estimated effort

Score: 42 -> 100 (+58 points)

1564 tasks

WHY THIS MATTERS

This automated audit analyzed 73 files (8k lines of code) , identifying 1577 actionable findings. The 90-day remediation roadmap requires an estimated 10 hours + 24 hours + 3110 hours of engineering effort to bring the health score to 42 -> 100/100.
